

STORY / The Umbrella  
by Ingrid & Dieter Schubert  
CRAFT / Shaving Foam Rain Clouds

To find at home:

- Clear glass jar, vase or bowl
- Shaving foam (lots of supermarkets do a basics version for not many pennies)
- Food colouring in 2 or 3 colours
- Small bowls or containers
- Water
- Pipette or syringe or teaspoon (we used our old Calpol syringe)

What to do:

Fill the small containers with approx. 50ml warm water.

Add different colours of food colouring to each of the small containers.

Fill the clear glass with water about two thirds full.

Top it with a generous amount of shaving foam.

Use the pipette (or syringe or teaspoon) to drop the different colours of water onto the shaving foam cloud.

The colourful water will go through the shaving foam cloud and come down as rain.
